

## Economical handling technology with electric drive

### Possible application areas:

- Sorting scrap and recycling material
- Handling scrap and recycling material
- Feeding presses, cutters, shredders and similar
- Loading into containers and vehicles

Muldenzentrale Oberthurgau AG, Amriswil, Switzerland

Schnyder Transportunternehmung und Altmetalle AG,  
Tann, Switzerland

### Benefits of the electric drive:

- Low energy costs compared to a diesel drive
- Low maintenance costs compared to a diesel drive

### Benefits of hall operation:

- No exhaust emissions
- Low noise levels compared to a diesel drive

A. Leber Rohstoffe, Offenburg, Germany

MRS, Metall Recycling Service, Willich, Germany

### Baljer & Zembrod as a system supplier:

- Our engineering specialists cooperate with the customer to develop the optimum solution for them.
- Each product is tailored to the customers own needs.

### Baljer & Zembrod:

- Producer of over 2,000 sorting carriages and heavy-duty cranes
- Over 60 years of experience
- Headquarters and production site in Altshausen, Baden-Württemberg
- A family business
